

Overview of tested types of light sources and the loads

As is our good tradition, we have always been seeking for a maximum universality of our products. We have successfully developed a dimmer DIM-15 and SMR-M, and because the LED lighting dimming - as well as dimming of energy saving lamps - is a relatively new area and there are not so many manufacturers who produce dimmable energy saving resources, we will gradually test and expand the chart below. We welcome your feedback and cooperation in addressing us your comments and new types.

Type	Light sources ELKO Lighting	Socket	Dimmable	The maximum number of units can be connected to dimmers				
				SMR-M	LIC-1	DIM-14	DIM-15	DIM-6
 DLB-E27-806-2K7		E27	yes	11	21	36	21	145
 DLB-E27-806-5K		E27	yes	11	21	36	21	145
 DLSSL-GU10-350-3K		GU10	yes	25	45	74	45	300
 LSL-GU10-350-3K		GU10	yes	13	25	40	25	165
 LSL-GU10-350-5K		GU10	yes	13	25	40	25	165

Please note:

May lead to different results based on the state of network cable length and other factors.

This table contains the results of tests that were conducted internally and therefore is ONLY for customers only informative.

The products were tested in test laboratories ELKO EP, and therefore the company assumes no responsibility for any imitation test environment.
